MEISTERWERKE IN STAHL

PASTE FOR STROPS FOR CUT THROAT RAZORS

1. YELLOW/WHITE (# 504171)

Should be worked into the leather of the strop with the palm of your hand with slight pressure. It is very important that all strops are treated with the paste to keep it smooth and to avoid the drying out of the leather which would result in cracks and damaged cut throat razors.

2. GREY (# 504111)

This paste is for the hemp/canvas on the back of some of the strops. If the cut throat razor blade is prepared for the leather stropping on the hemp/canvas, the grey paste should be worked into that material in the same way the yellow/white paste is worked into the leather.

3. BLACK (# 501000, together with RED)

For a very fine sharpening effect. **For trained users only**, requires a separate strop then the one for everyday stropping. Should be applied with a cotton cloth.

4. RED (# 501000, together with BLACK; or 504031)

For medium-fine sharpening effect. **For trained users only**, requires a separate strop then the one for everyday stropping. Should be applied with a cotton cloth.

5. GREEN (# 504041)

For strong sharpening effect. **For trained users only**, requires a separate strop then the one for everyday stropping. Should be applied with a cotton cloth.
